Steel Pressure Blowers. Built in all sizes up to 64 inches in height.

The Champion 20-inch Back-Geared Upright Power Drill. With Square Base.

Chesterton's Packing

"Redbestos"

TRADE MARK REG.

SHEET PACKING

Not affected by OIL, ALKALIES or AMMONIA. Made of the successful Asbestos and Rubber Compound but made red to meet the fancy of those who prefer this color.

"Metal-Asbestos"

TRADE MARK REG.

For Any Pressure of Steam, Gas Engines, Automobile Use, etc.

It is a pure, hard-woven Asbestos Cloth, having a fine brass wire twisted into each yarn. The surface is coated with a special rubber compound that will resist the action of steam.

In rolls 40 inches wide.

"Pressure Proof"

TRADE MARK REG.

FOR HIGH SPEED ENGINES AND THROTTLE VALVES

A Rubber-back Asbestos Packing made to meet a demand created by the high pressures of steam now used. It cannot burn, and is not injured by the temperature of the stuffing box. It is lubricated and graphited. Being absorbent, it takes up and stores the oil used on the rods and so prevents friction.

"Sunset"

TRADE MARK REG.

Sectional Gaskets for Manhole and Handhole, Plates of Boilers, Tanks, Etc. Made with Cloth Insertion.

"Sonderglas"

THE UNBREAKABLE GUAGE GLASS
---Two Semi-Metallic Gage Glasses in One

WHY TWO IN ONE?

Because you needed a stronger gage glass—a tougher gage glass—one that would not break under high pressures or from cold draughts.

Read below how this "two-in-one" principle means a better gage glass for you.

It is made of two semi-metallic tubes fused into one, each tube having a different degree of expansion. The inside tube expands in proportion to the temperature of the steam or hot water, and the outside in proportion to the temperature of the atmosphere.

The outside tube protects the inside and the inside tube protects the outside. A draft of cold air or a dash of cold water will not and cannot break Sonderglas. We believe we are making a modest statement when we say that Sonderglas is the strongest and toughest gage glass made, and we know you will say the same after you once try it.

And it stays clear—will not cloud up. Water is always visible.
